

Appendix: Comparator Profiles, Data Sources, and Judgement Calls

ControlAI

Organisation: ControlAI. Founded 2024. 9-15 FTE total (growing over the period), ~3 parliamentary advocacy FTEs.

Campaign: Getting UK parliamentarians to sign a statement recognising superintelligence as a national and global security threat, recognising AI as an extinction risk, and calling for binding regulation on the most powerful AI systems. Launched December 2024.

Results: 125 parliamentarians (93 Westminster, 32 devolved legislatures) by 5 May 2026. 160+ formal briefings. ~48.5% conversion rate (strictly defined: lawmakers not yet supporting before a meeting who signed after). Two House of Lords debates. Cross-party Commons amendment NC12 tabled March 2026.

Rate: ~94 parliamentarians/year.

Sources: All figures from ControlAI's [2025 Impact Report](#), controlai.com, and personal communication with CEO Andrea Miotti. The cumulative signatories chart (Figure 1) was provided by ControlAI from internal records.

Zero Hour

Organisation: Zero Hour Ltd (company limited by guarantee, [no. 12846343](#)). Not a charity. ~15 operational roles, mostly volunteers. Founded 2020.

Campaign: Getting MPs to support the Climate and Nature Bill across five parliamentary sessions since 2020. The bill requires achieving the 1.5°C target, halting biodiversity loss, and establishing a Climate and Nature Assembly.

Results: 192 MPs and 54 Peers. 75,523 registered supporters. Bill passed House of Lords (2022-23) but not enacted. Second reading Commons vote 120-7 (January 2025). Government committed to annual climate/nature statements instead.

Resources: ~15 staff (mostly volunteers), 1-2 parliamentary advocacy FTEs.

Rate: ~45 parliamentarians/year (or ~35 MPs/year).

Sources: Supporter counts from zerohour.uk. Staffing from the Zero Hour website team page. Parliamentary advocacy FTE estimate (1-2) is based on the team page describing most roles as volunteer and campaign-focused rather than parliamentary-focused.

People's Pledge

Organisation: Registered with Electoral Commission as "TSA Party" ([PP894](#)). Chaired by John Mills (JML founder, major Labour donor). Directed by Mark Seddon (former Tribune editor, Labour NEC member). ~4-6 core staff.

Campaign: Getting MPs and the public to pledge support for an in/out EU referendum. Launched March 2011. Distinctive tactic: independently scrutinised constituency referendums run by Electoral Reform Services.

Results: 87 MPs in ~12 months. 128,000+ public signatories. Boris Johnson signed 10 days after launch. 111 MPs voted for referendum motion (October 2011). Cameron pledged referendum in Bloomberg speech (January 2013). Widely credited as a key factor in the 2016 referendum.

Resources: ~4-6 core staff, ~3-5 parliamentary advocacy FTEs.

Rate: ~87 MPs/year.

Sources: MP count, timeline, and key events from the [People's Pledge Wikipedia article](#) and contemporary media coverage (Guardian, ConservativeHome, BBC). Staff names and roles from media profiles. Staff count (4-6) and parliamentary FTE estimate (3-5) are based on named staff and the campaign's scale of operations.

Conservative Environment Network

Organisation: Company limited by guarantee ([no. 08582661](#)). Not a charity. 11 paid staff. Founded 2010.

Campaign: Building a parliamentary caucus of Conservative MPs committed to environmental principles. Ongoing since 2010.

Results: Peaked at 130+ MPs (~37% of Conservative parliamentary party, ~2022-2023). Currently 49 MPs + 31 Peers (80 total) after Conservative losses in July 2024 election. Also 400+ councillors, 1,200+ grassroots supporters.

Resources: 11 staff, ~3-5 parliamentary advocacy FTEs.

Rate: ~10 MPs/year to peak (over ~13 years).

Sources: Staff count (11) and named staff from cen.uk.com. Caucus membership figures from CEN's own reporting and media coverage of post-2024-election losses. Parliamentary FTE estimate (3-5) is based on the team page.

Net Zero Scrutiny Group

Organisation: No formal legal entity. Informal grouping of Conservative backbench MPs. Chaired by Craig Mackinlay MP, founded by Steve Baker MP. Links to Global Warming Policy Foundation.

Campaign: Opposition to UK government net zero policies via open letters to *The Telegraph*. Public launch January 2022.

Results: ~50 documented unique signatories (58 claimed). Largest single letter: 37 signatories. Credited as one factor in Sunak's September 2023 rollback of net zero commitments. Both key organisers lost seats in July 2024 election.

Resources: Zero external staff. Research infrastructure provided by GWPF. Costs absorbed into parliamentary office budgets.

Rate: ~17 MPs/year.

Sources: Signatory counts from analysis of published open letters in *The Telegraph* and other media. The 58 claimed figure is from Craig Mackinlay's own statements. GWPF links and Harry Wilkinson's dual role documented by [OpenDemocracy](https://www.opendemocracy.org) and [DeSmog](https://www.desmog.org). No formal organisation or filing exists. Parliamentary FTE estimate (0.5-2 informal) reflects that this was run by sitting MPs in their existing roles.

PSC Councillor Pledge

Organisation: Palestine Solidarity Campaign Ltd (company limited by guarantee, [no. 05213508](https://www.psc.org.uk)). Founded 1982.

Campaign: Councillor Pledge for Palestine launched December 2025 as part of Vote Palestine 2026 coalition. Councillors sign online form committing to uphold Palestinian rights, support accountability, and ensure council non-complicity through divestment and procurement.

Results: 1,152 councillors in ~2 months. 387 Green, 375 Labour, 115 Lib Dem, 5 Conservative.

Resources: ~12-18 staff, ~1-3 parliamentary advocacy FTEs.

Rate: ~6,900 councillors/year (but councillor-level, not parliamentary, and via digital sign-up).

Sources: Councillor count and party breakdown from [Al Jazeera](#) and PSC reporting. Organisation details from [Companies House](#). Staff count (12-18) is an estimate based on PSC describing itself as having a "small staff team." Parliamentary advocacy FTE estimate (1-3) is based on scale of activity; PSC's primary focus is grassroots mobilisation rather than direct parliamentary engagement.

Greenpeace UK - Project Climate Vote

Organisation: Greenpeace Limited (company no. 01314381) + Greenpeace Environmental Trust ([charity no. 284934](#)). Estimated 300-500+ total staff.

Campaign: Mass door-knocking programme to recruit "climate voters" ahead of July 2024 general election.

Results: 223,737 climate voter pledges. 50,000 doors knocked. 14,000+ phone calls. 2,500+ volunteers trained. 10,315 emails to candidates. 50+ post-election constituency events.

Resources: 300-500+ staff.

Rate: Not directly comparable (public pledges, not parliamentary endorsements).

Sources: Campaign results from Greenpeace UK's own published recap of Project Climate Vote. Total staff estimate (300-500+) is approximate; Greenpeace Ltd is a company, not a charity, so detailed staffing is not publicly reported. Parliamentary advocacy FTE is listed as unknown because the campaign was primarily public mobilisation, not parliamentary engagement.

Results UK

Organisation: RESULTS Education ([charity no. 1015286](#), company no. 02761858). 23 employees. Founded 1986.

Campaign: Ongoing APPG-based parliamentary advocacy on international development. Secretariat to APPGs for Global Education, Global Tuberculosis, and formerly Vaccinations for All and Nutrition for Development.

Results: 375+ parliamentarians across all APPGs (2021 figure, likely lower post-2024 election). Cross-party engagement. Generated parliamentary debate and international delegations.

Resources: 23 staff, ~6-8 parliamentary advocacy FTEs.

Rate: ~9 parliamentarians/year (over 40 years, but APPG membership is ongoing and fluctuating).

Sources: Staff count (23), trustee count, and financial history come from [Charity Commission filings](#). APPG membership figure (375+) from Results UK's own reporting (2021). Parliamentary FTE estimate (6-8) is based on the team page and the organisation's focus on APPG secretariat work.

Friends of the Earth - The Big Ask

Organisation: Friends of the Earth (EWNI) / Friends of the Earth Charitable Trust ([charity no. 281681](#)). ~120-150 staff during campaign. Established 1971.

Campaign: Mass grassroots campaign for legally binding climate legislation. Launched 25 May 2005 with Thom Yorke. Built Stop Climate Chaos coalition of 100+ NGOs. Mobilised ~200,000 people to contact MPs.

Results: 412 MPs signed EDM 178 (64% of all MPs). 620/646 MPs lobbied by constituents. Climate Change Bill in Queen's Speech within 18 months. Climate Change Act received Royal Assent November 2008. Only 5 MPs voted against at second reading.

Resources: ~120-150 staff total, ~10-20 FTEs on campaign.

Rate: ~290 EDM signatures/year (but EDM signing is low-commitment). 18 months from launch to government legislative commitment.

Sources: EDM 178 signature count comes from [parliamentary records](#). The campaign timeline and results come from FoE's published campaign history, the [Climate Change Act 2008 Wikipedia article](#), and academic accounts. Historical staff count (~120-150) and campaign FTE estimate (~10-20) are based on more recent campaigns; FoE does not publish historical headcount details for individual campaigns.

Lobbying environment data

Ministerial meeting data was extracted from official quarterly transparency CSV files published on [gov.uk](#) for seven departments: DSIT, Cabinet Office (including PM), HM Treasury, DBT, Home Office, DESNZ, and DfE. Six of seven have complete five-quarter coverage (Q4 2024 - Q4 2025); DBT is missing Q4 2025 (not yet published). MoD does not publish in the standard quarterly format. Each CSV was searched programmatically for AI-related meetings based on organisation names and purpose descriptions. Coding decisions (AI-related yes/no, industry vs non-industry) involved judgement, particularly for multi-organisation roundtables and meetings with ambiguous purpose descriptions.

Consultant lobbyist data was extracted from the [UK Register of Consultant Lobbyists](#) quarterly information returns for Q4 2024 through Q4 2025.

Cross-cutting judgement calls

Parliamentary advocacy FTEs. Most organisations do not publish details of staff by function. Our FTE estimates are based on team pages, role descriptions, and the character of each organisation's work. These are approximate estimates and should be treated as such.

"AI-related" meeting classification. We coded a ministerial meeting as AI-related if the organisation is a known AI company or if the purpose text explicitly mentions AI or closely related terms (frontier AI, foundation models, compute, data centres, semiconductors, etc.). Borderline cases (e.g., a tech company at a general investment roundtable) were included but flagged as "unclear" regarding industry-access.

Comparability of "lawmakers signed." ControlAI's 125 includes devolved-legislature members, the People's Pledge's 87 is MPs only, Zero Hour's 246 includes Peers, FoE's 412 is EDM signatures (low commitment), Results UK's 375+ is APPG membership. We do not attempt to normalise these numbers by legislature type.
